This rider is available only to new renewable energy generation as described below, commissioned and completely installed on and after August 1, 2015. This rider shall remain effective until modified by City Council.

APPLICABILITY

The Avoided Cost Credit for Renewable Energy Generation set forth in this rider is applicable to Renewable Energy Generation, Type 4 REG, as those terms are defined in Power Agency’s Policy Regarding Generation on Participant Distribution Systems, dated December 1, 2009.

AVOIDED COST CREDIT RATE

A cost credit rate will be applied in each month to each Type 4 REG, as measured in kWh for such month, in accordance with the following:

Type of Rate

- For each Customer with a Type 4 REG who has executed a Power Purchase Agreement with the City of Morganton for delivery power with a term of five, ten or fifteen years, the Fixed Long-Term Rates, as outlined below, will be applied based on the type of renewable generation.
- For each Customer with a Type 4 REG who chooses to sell energy to the City of Morganton on an “as available” basis and executes a Power Purchase Agreement with a one year term, the Variable Rates, as outlined below, will be applied based on the type of renewable generation.
-
